

Computing Your GPA

FORMULA

1. Grade Scale Value x Number of Credit Hours = quality points for the course
2. Add the quality points that you earned for your classes.
3. Divide the total # of quality points by the number of credit hours attempted that were attempted (excluding courses from which you withdrew).

GRADE SCALE VALUE

A	=	4
B+	=	3.5
B	=	3
C+	=	2.5
C	=	2
D	=	1
F	=	0

SAMPLE

The following grades were earned by a student in his/her first semester in college.

<u>Course</u>	<u>Credit Hour x Grade</u>	<u>Quality Points</u>
UNV 101	NA*	NA
FYS 101	4 x C (2)	8
HIS 111	3 x D (1)	3
MAT 133	4 x B+ (3.5)	14
CHR 150	3 x A (4)	12
	Total Credit Hours: 14 (exclude credit hour for S/U course)	Total Quality Points: 37

$$\text{GPA} = 37 \div 14$$
$$\text{GPA} = 2.643$$

*Satisfactory/unsatisfactory classes are not included in the calculation of the GPA.
