

Campus Spotlight!

Students will choose a location from the stack of cards and work in pairs or with a small group to discover information about the particular campus event, department or service. Students will share this information with peers in class in a 2-5 minute presentation. Potential items that should be shared include the following:

- Location
- Function/Purpose
- Key People/Staff
- Sponsored Events
- Available Resources
- Why Students Should Utilize

In preparation for the presentation, it will be important that students visit the location in question and possible even schedule a meeting with a staff member who could explain more about the area. (Depending on when the topic is to be presented to the class, enough time should be allotted to complete a visit/interview and still prepare for the presentation.)

Students are encouraged to use creativity when presenting the information to the class, but the final format is ultimately at the discretion of the pairs or small groups. The primary focus of this activity should be on the discovery of something new and interesting about campus locations that could potentially be useful to any Mercer student.

Have fun with the assignment!
